

Garwood International

MaxiPact

- ❖ Full width rear loading compactor
- ❖ Capacities of 19, 20 and 21 cubic metres
- ❖ Wide deep hopper suitable for hand loading, MGB loading, bulk steel bin loading
- ❖ High volumetric efficiency
- ❖ Quiet operation - runs at low engine RPM
- ❖ Choice of control systems - push button or lever operation
- ❖ Environmental protection equipment includes in-built sillage tanks to prevent leakage.
- ❖ Optional high pressure water blaster cleansing system driven from compactor hydraulics

MaxiPact

LARGE SIZED REAR LOADING REFUSE COMPACTOR

The big brother to the POWAPACT sharing all the design and engineering advantages but in a larger capacity form.

Range of sizes available in **MaxiPact** are 19/20 and 21 cubic metres.

Standard hopper capacity 2.2m³ with extension to 3.3m³.

MaxiPact relies on high volumetric efficiency to handle incoming materials. The compactor cycle time is 28 seconds (approximately).

Extensive use of bisalloy H.T. steel in the tailgate areas - including bowl, sides and packing panels.

By use of the "Clean Skin" body design and construction the combined all up weight of **MaxiPact** is less than its competitors which results in extra payload capacity on smaller GVM trucks.

MaxiPact is the quietest compactor on the market. In spite of the efficient cycle times the **MaxiPact** can operate at low engine speed which means less noise intrusion for operators and residents.
